

## Review: Dead Frontier

Dead Frontier has burst onto the online zombie game scene this year and really set a new standard for graphics, atmosphere and gameplay. With the release of Night Two, Jagged Blade Software gives us a zombie horror game which is actually scary. With eerie sounds, and unrelenting zombies that approach us in undying numbers. This is a game that feels hopeless, and yet you are driven to complete it, and the % COMPLETE indicator at the top of the screen helps to encourage us onwards. In this release, the level is much larger, and they have introduced headshots. Poor shots from far away do less damage than well placed shots from close up.

If they were able to add a storyline, this is a game that could truly become a platformer. It's a pleasure to play, and I can't wait to see what future Nights have in store for us.
